NEW IT.TAMU.EDU Web Site

With so many web sites and so little time, have you wondered where to begin to look for information about campus IT services? Because information is dispersed across so many sites, finding the right web page to answer your question can sometimes seem like a scavenger hunt.

To help you find your way, Texas A&M Information Technology recently launched a new site: IT.tamu.edu. It’s like a road map to the campus IT information and resources that you need. More than just a road map, IT.tamu.edu also provides cues and clues to keep you headed down the right path. Look inside for a guided tour of the IT.tamu.edu web site.

We hope you’ll visit IT.tamu.edu when you are looking for information about IT services at Texas A&M. Let us know what you think of the site by emailing your questions or comments to it-coms@tamu.edu.

About the PossibilITies Newsletter

We’ve packed it full of news, useful tips, and even a crossword puzzle that will help you get the most from your campus IT resources. We’ll publish the newsletter every semester to inform you about what IT can do for you.

Please tell us what you think about the articles or what you’d like to read in the future by emailing it-coms@tamu.edu.

If you have questions about an IT service, you can contact Help Desk Central, anytime day or night, at 979.845.8300 or helpdesk@tamu.edu.

During the month of February, you can Find IT and Win. Search through IT.tamu.edu for the hidden IT icons and be entered for a chance to win Eccell gift cards.
IT.tamu.edu Guided Tour

Welcome to your guided tour of the new IT.tamu.edu site. Take a look through our new site to see the features that will be useful for you. For a video tour of the site, visit IT.tamu.edu and click the Video Tour image.

Home Page - Texas A&M IT at your fingertips

Let’s begin on the home page. It provides many ways to find the information you need.

Service Menu Bar
Hover over the menu titles to see a dropdown services menu.

Rotating Spotlights
Look at 3 or 4 services that are timely or new.

Just for You Button
Go to a page designed specifically for you as faculty and staff.

Customizable Search Box
Search only the IT site or all Texas A&M IT sites.

Top Searches
Take a quick glance at services that are being commonly searched.

Faculty/Staff News
See news written just for faculty and staff or subscribe to the RSS.

Service Page - Quick reference about each IT service

After using the home page to find the service you need, you will visit a service page with a brief description and useful links.

Summary
A brief description of what the service is and what it lets you do.

Getting Started
An action link to use the service.

Learn More
An information link to read more about the service.
Phishing

Phishing is attempting to steal information using web sites or emails that appear to be from someone you trust. For example, you may receive an email that appears to be from your bank asking you to confirm your account number and PIN. A malicious sender can use this information to steal from your account.

So, what can you do? When you receive messages that ask for personal information remember:

1. Never send confidential information through email.
2. Avoid clicking links in email messages; type a trusted web address instead.
3. Look for anything suspicious (i.e., misspellings, bad grammar, unusual web addresses).

For additional information about staying safe online, visit security.tamu.edu.
